+91 8402064033 | Bengaluru, India

dasarijeetkumar@gmail.com | linkedin.com/in/arijeet-kumar-das | github.com/Arijeet-Kumar-Das | arijeetkumardas.dev

Skills

Languages: JavaScript (ES6+), Python, Java, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

AI / RAG: OpenAI API, Pinecone (Vector DB), NLP, LLM Integration, RAG Pipelines, Scikit-learn

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: Git, GitHub, Vercel, Render, Cloundinary, Docker (basic), Postman, JIRA, CI/CD

Practices: Agile/Scrum, Multi-tenant Architecture, REST API Design, Code Review

Projects

HA-RAG: Hybrid Adaptive Retrieval-Augmented Generation System

2025 | GitHub | Live Demo

React.js, Node.js, Express.js, OpenAI API, Pinecone, Cloundinary, JWT, Vercel, Render

- Engineered a full-stack document QA system using hybrid RAG (OpenAI embeddings + Pinecone), retrieving top-5 chunks from 10+ vectors/query to generate context-grounded answers; deployed via CI/CD to Vercel (frontend) and Render (backend).
- Reduced hallucination by ~40% using keyword + LLM-based verification layer; implemented in-memory response caching so repeated queries are served instantly without re-invoking the RAG pipeline, with persistent chat history via JWT-based auth.

AI-Powered College Assistant

2025 | GitHub | Live Demo

React.js, Node.js, Express.js, MongoDB, JWT, NLP, LLM Integration, Vercel

- Architected a 3-role platform (Student, Teacher, Admin) with JWT auth and access control across 5+ academic modules – attendance, marks, subjects, student profile, and automated leave applications via Nodemailer.
- Developed an NLP intent classifier handling 15+ structured intents (attendance, marks, CIE/SEE breakdown, leave routing etc.) with LLM fallback for open-ended queries – reducing redundant API calls while maintaining conversational flexibility.

Experience

AI/ML Engineer Intern

Feb 2026 – Present

Vrityfy AI

Remote

- Building CIRA (Contract Intelligence & Risk Analyzer) – a multi-tenant SaaS on FastAPI, React.js, and PostgreSQL with an end-to-end NLP pipeline: OCR → clause parsing → stylometry analysis → risk detection → AI-driven clause recommendations.
- Engineered async background task processing for document analysis pipelines and a multi-factor risk scoring engine that aggregates clause-level severity into an overall contract risk score.
- Designed a React.js dashboard with Tailwind CSS delivering explainable AI outputs – risky clauses highlighted inline with severity labels, plain-language explanations, and safer clause suggestions; GitHub: cira-contract-intelligence.

Full Stack Developer Intern

Jun 2025 – Sep 2025

Bytedocker

- Architected the admin panel end-to-end for a Tournament Management Platform (React.js, Node.js, MySQL) – including real-time visitor analytics via Socket.io, tournament organization, and role-based dashboards.
- Took ownership of the live scoring module after a team member's departure, completing the full platform independently; collaborated in a 3-member agile team and optimized API response time via Node.js handler refactoring and MySQL index optimization.

Software Engineer Intern

Jan 2023 – Jun 2023

Geekworkx Technologies

- Developed two React.js apps for a Restaurant POS system – a waiter app (customer registration, order placement) and an admin dashboard (inventory management, invoice generation, profile management) – backed by Node.js and MySQL.
- Integrated real-time order notifications via Socket.io so the admin receives instant alerts on new orders; reduced manual billing errors by ~40% through DB-driven invoice generation and real-time form validation. GitHub: restaurant-pos-system.

Education

Master of Computer Applications (MCA)

Dec 2024 – May 2026 (Expected)

B.M.S. College of Engineering, Bengaluru

CGPA: 8.73/10

Bachelor of Computer Applications (BCA)

Oct 2020 – Jun 2023

NERIM Group of Institutions, Assam

Aggregate: 81.25%

Certifications & Achievements

- 2nd Prize** – Hack-The-Work 2025 Hackathon, B.M.S. College of Engineering × Vipra Software Pvt. Ltd. – built and deployed a full-stack solution end-to-end within 24 hours.
- Scrum Fundamentals Certified (SFC)**, SCRUMstudy – applied Agile/Scrum sprint methodology across internship cycles at Bytedocker and Vrityfy AI.
